COLI Workshops

The Center for Online Learning & Innovation offers workshops broadly supporting web- and information technology-enhanced teaching and learning. Come learn how to use features in D2L, Google Apps, and other web-based productivity apps to teach and support your class via the internet. These workshops are now online, for public safety reasons.

You can see workshop or event descriptions here.

Meetups

These meetups are for various interests among faculty. We currently have two: Student Support and Engagement and Data Meetups. All are welcome to join in on the conversation.

Lunch Updates

Take time during lunch to learn a new skill! These lunches provide opportunities to learn about creating an Inclusive Syllabus and using Panopto for developing easy course videos.
