Using the iMac's DVD Drive

From the Mac OS you can eject your disc by either pressing the eject button found in the top right corner of the keyboard or by clicking on the disc icon and dragging it to the trash can.

Powering Up the Equipment

The ceiling-mounted LCD projector is controlled using the EPSON remote control.

Press the POWER button to turn on the LCD projector. After pressing ON, wait until the projector has warmed up before selecting the desired source button on the EPSON remote control. The projector will not receive the command to switch until after it has finished warming up.

The resident computer, document camera, and DVD player are each powered on using the appropriate button located on the device.

NOTE: The MASTER POWER switch, located at the top of the rack behind the lectern, must be turned on in order to use the technology in the room.

Projection Screen

Use the screen control wall plate, found to the right of the whiteboard, to operate the motorized screen. UP, DOWN, and STOP buttons are provided.

Projector Standby (PIC-MUTE)

Press the A/V MUTE button on the EPSON remote control once to place the projector in standby mode. Simply press the button again to take the projector out of standby.

Volume

The adjustment of volume is done using the mixer located in the rack behind the lectern.

NOTE: Computers have their own volume controls which may need to be adjusted separately.

Resident Computer @ Lectern

Press the POWER button on the resident computer to turn it on. LY 307 is equipped with an iMac, an all-in-one desktop computer. A USB port is located on a plate on the wooden wedge on the right-side of the lectern.

Once the computer has been powered up, press both the COMPUTER button on the EPSON remote control until the projector is set to COMPUTER 1 mode and button #1 on the Extron switcher to display the image on both the monitor and LCD projector simultaneously.
Screen and additional lighting controls, along with a phone, are located on the wall behind the lectern.

The computer is located on the lectern.

**Document Camera (ELMO P10)**

Power on the document camera by using the slide located on the right-side of the unit near the back.

Once the document camera has been powered up, press both the COMPUTER button on the EPSON remote control until the projector is set to COMPUTER 1 mode and button #2 on the Extron switcher to display the image on the LCD projector simultaneously.

Iris, Zoom, Auto Focus, and Lamp controls are located on the front of the document camera.
DVD Playback (via the DVD player)
Once the equipment is powered up, insert your disc into the SONY DVD player. The DVD player is controlled using the buttons on the unit or the corresponding SONY remote control provided.

Press the VIDEO button on the EPSON remote control until the projector is set to VIDEO mode to display the DVD image on the LCD projector.

Powering Down the Equipment
Press the POWER button twice on the EPSON remote control to turn off the LCD projector.

The resident computer, document camera, and DVD player must be powered off separately. Instructions for shutting down the computer are found below.

Be sure to remove any media from the equipment before shutting it down.

Powering Down the Resident Computer

1. Open the Apple Menu (click on in the upper-left corner) and select "Shut Down...".
2. A dialog box will appear. Click the "Shut Down" button in the dialog box.
