Welcome to the Center for Online Learning & Innovation (COLI) Wiki. The Center for Online Learning & Innovation supports three concrete efforts at the college. First, it promotes, supports and guides academic technology initiatives. Second, it serves as a central point of contact for distance learning needs, coordinating departmental efforts for online learning, quality assurance and consistency in online courses, and online innovation endeavors. Third, it encourages innovation across campus through technology and new processes, including in teaching and learning and everyday work.

The COLI Wiki is a supplement to our existing Web page and contains information about our trainings and planning. We hope to see you at one of our upcoming events!

### Table of Contents:
- Canisius Innovation Conference
- COLI Badges
- COLI Campus Meetups and Events Calendar
- COLI Consultations
- COLI Planning
- COLI Self-Paced Training
