### Bibliographies, Works Cited, and Reference Lists

<table>
<thead>
<tr>
<th>Hanging Indent</th>
<th>Microsoft Word</th>
</tr>
</thead>
<tbody>
<tr>
<td>Indent second and subsequent lines of a bibliography entry (or paragraph)</td>
<td>Windows:</td>
</tr>
</tbody>
</table>
| | • Follow these instructions
| | • Or Highlight a bibliography entry, or multiple entries, and click CTRL-T. You can draft your complete biography, highlight all entries, and press CTRL-T to apply hanging indents to all. |
| | Mac: |
| | • Follow these instructions |
| Google Docs | • Follow these instructions |

### Composition
Special Characters
letters and accents in languages other than English

Microsoft Word
Windows:
- Follow these instructions

Mac
- Follow these instructions

Google Docs
- Follow these instructions

Unicode and ASCII Characters
You may use a set of characters not printed on your keyboard on a regular basis. If you are writing in French, for example, you need to use letter keys' secondary numbers, which is complicated and may mean Unicode is more worthwhile. On the other hand, ASCII code recognizes Unicode. To add a special character via ASCII code to your document, hold down the ALT key, while typing the four-digit code. For example, ALT+0233 prints é.

Unicodes are different; è is Unicode 00E9. You enter these by typing in the code, and then pressing ALT-X. These are friendlier to laptop keyboards since you needn't engage NUM lock. Word Processors like MS Word will recognize them, but web browsers, and Google Docs running in a web browser, will not.

Character Map
In most Word Processors you can access a character map, or menu that allows you to click the character you want and install it.

In MS Word, the character map is also a handy reference for discovering ASCII or unicodes. To access the Character Map in MS Word, click Insert in the top menu bar, and from the ribbon, choose Symbols to open a menu. There, choose More Symbols...

Google Docs also has a character map, accessed via the Insert Menu: Special Characters.

You can find more information on ASCII, Unicodes, and the Character Map in Microsoft Word here.
