

# WordPress: Tips for Better Web Development

## Open Link in A New Tab

When you install hyperlinks in text or buttons on a page or post within WordPress, it's good to have that link open the page or site in another browser tab. This means people simply close the tab to return to your WordPress page or post, rather than having to use the back button.

Click the Cog next to the link when first you create it, or edit it.

If you have any questions about the event, please contact [Mary Braun](#) at Ext. 27 and our [Canisius](#) community!

[Click Here to Add this Event to Your Digital Calendar.](#)

<https://25livepub.collegenet.com/eventactions/>

In the following dialog/options box, click "Open Link in New Tab."

The screenshot shows the WordPress 'Insert/edit link' dialog box. The URL field contains 'https://25livepub.collegenet.com/eventactions/pro'. The Link Text field contains 'Click Here to Add this Event to Your Digital Calendar'. The 'Open link in a new tab' checkbox is checked and highlighted with a red box. Below the dialog box, a list of recent items is visible, including 'Canisius Proud', 'Campus Candid', 'Institute for Autism Research Receives Grant', 'PHETE Majors Assess Childhood Fitness', 'International Relations Program to Host 40th High School Model UN Conference', and 'Trip to Cuba with Richard Reitsma, PhD'.

Item	Date
Canisius Proud	2018/10/26
Campus Candid	2018/10/26
Institute for Autism Research Receives Grant	2018/10/26
PHETE Majors Assess Childhood Fitness	2018/10/26
International Relations Program to Host 40th High School Model UN Conference	2018/10/26
Trip to Cuba with Richard Reitsma, PhD	2018/10/26
