Please Note: This room's PC does NOT have a DVD drive. If you are planning on playing a DVD, CD, etc. you will need to use the room's DVD or Blu-ray player.

Need to access files saved on a DVD from the computer? You can arrange for use of a portable optical drive by contacting the ITS Help Desk at ext. 8340.

Staff can also provide assistance outside of class time with moving files off a disc to D2L, Google Drive, etc. so you can access the files without needing to use a portable optical drive.

Wireless Projection Pilot Program

As part of a pilot program for Spring 2017, this room’s resident computer allows for wireless mirroring of iOS and Android devices via Reflector 2.

After logging into the resident computer, double click on the Reflector 2 icon on the desktop. Make sure your phone or tablet is connecting to the gryphon wireless network before proceeding.

iOS Instructions

- After unlocking your device, swipe up from the bottom of the screen to open the Control Center.
- Tap the AirPlay Mirroring icon to reveal the AirPlay list.
- The classroom you are in should be in the list. Simply select it to mirror the image from your phone/tablet on the computer desktop.
- You can contact the ITS Help Desk at ext. 8340 to get the needed password.

Android Instructions

- After unlocking your device, use the built-in Cast* function to display the list of available devices.
- The classroom you are in should be in the list. Simply select it to mirror the image from your phone/tablet on the computer desktop.
- You can contact the ITS Help Desk at ext. 8340 to get the needed password.

*Don’t have the ability to Cast on your device? Download the Google Home app on your device first.

Powering Up the Equipment

The equipment is controlled from the lectern using a Crestron Touch Panel Interface.

If the touch panel’s screen is black, touch the screen to wake the display. When the Canisius Logo Screen appears, tap the screen and enter the required Access Code (63520).

After successfully entering the Access Code, the equipment will power-up and the Crestron will display the message “Please Wait...LCD Projector Warming-up.” Once the projector is ready, the Crestron will display the Main Menu, further identifying the function of the hard-buttons.
After unlocking the device, open the Google Home app. Press the menu icon in the upper left corner and select Cast screen / audio. Press the CAST SCREEN / AUDIO button to see the Cast to list. The classroom you are in should be in the list. Simply select it to mirror the image from your phone/tablet on the computer desktop. You can contact the ITS Help Desk at ext. 8340 to get the needed password.

The resident computer, document camera, and Blu-ray player are powered on using the appropriate button located on these devices.

**Projector Standby (PIC-MUTE)**
Each source page (Local Computer, Podium Laptop, Document Camera, etc.) has a Projector Standby button located in the lower left corner of the screen. Pressing this button once will place the projector in standby or pic-mute mode. While this mode is active, the button will flash. Simply press the button again to take the projector out of standby mode.

**Volume**
Each source page (Local Computer, Podium Laptop, Document Camera, etc.) has a volume control section located on the right side of the screen. Volume up, down, and mute controls are provided.

**Projection Screen**
Press the SCREEN button on the Crestron to display the appropriate touch-screen controls. Up, down and stop buttons are provided.

A wall plate, found to the left of the whiteboard behind the lectern, can also be used to control the screen.

**Resident Computer @ Lectern**
Press the POWER button on the resident computer to turn it on. **SH 1028 is equipped with a HP computer.** A USB port is located next to the Crestron. Additional USB ports are found next to the computer's power button.

Once the computer has been powered up, press the PC (Computer) button on the Crestron to display the appropriate touch-screen controls.
Lighting controls, along with a phone, are located next to the door.

The computer is located on the left shelf of the lectern.

Document Camera
The Doc Cam's power and lights must be turned on manually using the controls located on the camera itself. Click here for more information regarding the document camera found in this classroom.

Screen and additional lighting controls are located on the wall behind the lectern.

Using the Floor Pockets

Additional electrical outlets can be found inside the floor pockets located on the floor of the room.

Blu-ray or DVD Playback (via Blu-ray player)
Press the OPEN/CLOSE button on the Blu-ray player and insert your disc (DVD or Blu-ray) into the disc tray. Press the BLU-RAY button on the Crestron to display the appropriate touch-screen controls.
Pull up on the handle to unlatch the cover.

Pull open the cover fully to access the inside of the floor pocket.

The Blu-ray player is in the rack

Touch-buttons are provided which allow you to control the Blu-ray player from the Crestron. The only time you ever touch the Blu-ray player itself is to insert or eject your disc.

Connecting a Laptop

The cables needed for connecting a laptop computer are found on the instructor's lectern. In addition to cables for connecting a laptop, a power outlet is also located on the lectern for your convenience.

Plug the power cord for your device into one of the available electrical outlets.

Using the VGA cable

Using the HDMI cable

A sliding door is located on either side of the floor pocket cover.

1. Plug the VGA cable into your laptop's VGA port.

1. Plug the HDMI cable into your laptop's HDMI port.

2. Plug the Ethernet cable into your laptop's network jack (if

2. Plug the Ethernet cable into your laptop's network jack (if

Slide the door clockwise to open it. This will allow you to close the floor pocket cover while having cables connected.
To ensure that the cover closes flush, make sure the two “teeth” opposite the handle are seated properly into the floor pocket.

3. Plug the audio cable into your laptop’s headphone jack.

4. Press the LAPTOP button on the Crestron to view the “Podium Laptop” screen.

5. Press the “Analog (VGA) Laptop” touch-button.

6. Turn on your laptop’s power.

7. If needed, set your laptop to display on a secondary display.

Don’t have a VGA or HDMI port on your laptop? Visit Training & Support to find out what type of adapter is needed to connect your laptop.

Classroom Capture
A mobile classroom capture system can be connected in this room for recording lectures, guest speakers, etc. It allows for video & audio recording of the faculty member along with (non-encrypted) content from the resident computer, a laptop, or the document camera. Users must provide their own USB thumb drive in order to record. Click here for more information.
Connect the capture cart to the HDMI output port on the rack

**Auxiliary Video Input**
Use the external Audio/Video cables located on the instructor's lectern to display images from a portable VHS VCR or other external device; composite audio/video cables are provided.

After connecting your device with the appropriate cables, press the AUX button on the Crestron to display the appropriate touch-screen controls.

**Click on the image below to zoom**

**Powering Down the Equipment**
Press the SHUTDOWN button on the Crestron to display the appropriate touch-screen controls. Press the "Yes, Shutdown" button to proceed with shutdown or the "No, Go Back" button to cancel.
The resident computer, document camera, and Blu-ray player must be powered off separately. Instructions for shutting down the computer are found below.

Be sure to remove any media from the equipment before shutting it down.

**Powering Down the Resident PC**

1. Open the Start Menu (click on in the lower-left corner).
2. Click the "Shut Down" button.
