Welcome to the Canisius College Information Technology Services Wiki. Here you can find documentation on a variety of digital resources at Canisius College. You can contact the ITS helpdesk at helpdesk@canisius.edu, or x8340, but often you can find an answer a little quicker by accessing our tutorials, guides, and documentation yourself.

You can browse through the pages here, but if you are looking for something specific, try starting at the ITS main site: www.canisius.edu/its. There you'll find the Quick Technology Guides, and direct links to specific resources for commonly used applications.

We are in the process of reorganizing the documentation you see here and at the Center for Online Learning & Innovation, so it's easier to navigate. Please bear with us as we complete this big job.

Thanks!
