Third-Party LTI Tools Notes

Occasionally, third-party LTI connections in D2L produce a new window, which gets stalled by Google Chrome's pop-up blocker:

To clear this, click on the window icon that appears on the right-side end of the URL or address bar in Chrome. In the resulting dialog box, choose "Always allow pop-ups and redirects from https://d2l.canisius.edu."

You will then need to re-try the link to the LTI tool.
