Changing Webcams in the Browser

You can change Webcams in your browser. This is useful for Video Notes in D2L or changing the camera in Google Meets. Note: in either case, for changes to take effect, you will have to reload the webpage so this cannot be done on the fly-- whatever camera you are using is the one you will be using for the rest of the meeting/recording. Also note that these changes will only take effect for that particular website and you will have to go through a similar process for other websites to grant permission. In this tutorial, three of the major web browsers will be discussed: Firefox, Chrome, and Edge. If you would rather a more visual tutorial, you can click on this link here.

Firefox

Add dates and restrictions...
will see why in a moment. Go to a website that will access your camera; in this tutorial, D2L’s Video Note option will be used.
Video Note, you will need to go to D2 Land, in this case, click on the description for your module.

2 When you click on the module.
Week 1

Add dates and restrictions...

Upon clicking on the menu will popup. Click on Add Video Note.

When you click on Video Note, D2L will show a popup.
By clicking on the dropdown menu, webcam appears in the upper left asking you what Camera and Audio devices to use.

By clicking on the dropdown menu, webcam appears in the upper left asking you what Camera and Audio devices to use.
“Integrate Webcam,”
you can having the webcams.

This is similar to the Microworld.

This is a functional.
Useful if you are making multiple videos or using Google Meet to constantly connect to other websites that require real-time access.
appear again when recording in D2
Later, if you decide to change the Camera, there are a few more steps, outlined in steps 8-10.
Once you have the camera and microphone, you want to use, click on Allow.

If you selected the Remember this decision, the pop-up will not appear again.
Pupin step 7 will not show if you want to change the camera (maybe you got a new camera). You will need to click on the red bl
in King camera asym bol o on the left hand side of the we b address bar.

Not: this will only appear when you access Video Note so
You will have to go through steps 1-3 again.

When you do that, Firefox will how you a similar prompt in steps 4-7, except...
You have use the Camera Allowed X and Use the Microphone Allowed X instead of the dropdown. Click on the X to the right of Us.
the Camera Allowed and reload the webpage.

Follow steps 1-7 again. Also note that this is saved only for this particular website.
Clicking on the circular dots in the upper right corner.

When you open Chrome, click on the circular dots in the upper right corner.

When you open Chrome, click on the circular dots in the upper right corner.
In the search bar that appears in the upper-middle of your screen (beneath the address bar), type "Camera."
In the list that appears, click on Site Settings.
In the next list that appears, scroll down until you find Camera, which should be highlighted.

When you do that, there will be
a drop down menu that says Integrated Webcam if you are currently using your laptop camera. If not, it may just say Webcam.
In the drop-down menu that appears, choose the webcam that you want to use.
In that list, underneath Camera, is Microphone. In a similar process, click on the arrow to the left of Camera to return to the list shown in step 5.
s to Camer, choo them to use. Oft
but not always, it may or may

When you first go to a website that requires the use of your camera, a pop-up will appear in the upper left.
If you have D2 or another site open that is currently using your Camera...
You may have to reload the website for the changes to take effect. You will also have to stop for a new website that you.
Contact allo with the use of your Camera or Microphone.

Edge
Chan ging Camer in Edge will have similarities.

First, click the thre hazional dots in the upper right of the browser.
In the menu that appears, choose Settings; it has a little gear icon on the left of it.

In the Search Bar in the upper left, type in Camera.
When you type in Camera, the menu options on the right will change; find and select Camera in the menu on the right.
In the drop down, you can select the camera you wish to use; in this case, Edgetohedron automatically detected the external webcam.
By clicking on the arrow pointing to the left of Search Results, you will be taken back to the menu for Site Permissions.

In this menu,
You can change the Microphone on your browser by clicking on Microphone and following similar steps for changing the

Microphone.
When you go to a site that you want to use your camera for the first time, Edge will have a little pop-up in the upper left skin...
If you want this site to use your Camera and Microphone. After this first time you will not be asked again. You will have to repeat this.
Every time you go to a new website that you want to use your Camera or Microphone on.
