How to fix Java version 8 update 91 for Banner

If you have applied the Java version 8 update 91 to your computer, you will need to make some settings changes for Banner to operate properly.

Step-by-step guide

Follow these steps to correct problems with Banner after installing Java 8 update 91:

1. Go to Start button -> Control panel -> Java -> advanced tab -> scroll to Advance Security Settings.
2. Uncheck "Use SSL 2.0 compatible ClientHello format".
3. Your Java control panel should look like this now:

![Java Control Panel](image)

4. Close and relaunch your browser.
5. If you are still having problems with Banner, please call the ITS Help Desk at x8340.
