Logging into Outlook Web Applications 2010

Although similar to previous web-based browsers Canisius has used in the past, Outlook Web Applications (OWA) offers a greatly enhanced feature set of productivity tools and productivity capabilities that will, once learned, make your life easier in so many ways. This tutorial will begin by helping you to understand the Login screen. The differences here include security settings and selecting the mode you’d like to use OWA in. You can also select a Light version or a Standard version depending upon your needs and other enhancements. This tutorial is approximately five minutes in length.

If you have trouble viewing this presentation, please read the preceding text which explains how to view these online tutorials. If you still have trouble please contact the ITS Help Desk at (716) 888-2299.
