**Powering Up the Equipment**
The power for each device must be turned on separately. The 50” plasma TV is powered on by pressing the POWER button on the accompanying LG TV remote control or the TV itself.

**Volume**
The adjustment of volume is done using the VOL + and - buttons on the LG remote control.

**Selecting an Input (or Source)**
You can use either the LG remote control or the controls on the TV itself to select what source displays. Press the INPUT button to view the “Input List” screen.
The “Input List” screen

Continue to press INPUT until your desired source is highlighted and then press OK. Your desired image should now appear on the TV.

Connecting a Laptop
The cables needed for connecting a laptop computer are found on the TV cart. The HDMI connection carries both video and audio. For more information see Selecting HDMI Audio Output.

RGB-PC (PC): Displays a laptop connected using the VGA cable
HDMI1 (PC): Displays a laptop connected using the HDMI cable; this icon will be grayed out unless the HDMI cable is connected.
3. Press the INPUT button on the LG remote control to view the "Input List" screen.

4. Press the INPUT button until the RGB-PC (PC) icon is highlighted and then press OK.

5. If needed, set your laptop to display on a secondary display.

**NOTE:** You can press the RATIO button on the LG remote control to toggle between the different aspect ratios available (4:3 and 16:9) to ensure your image appears correctly. Once you have selected the desired aspect ratio press the EXIT button to close the menu.

**Don't have a VGA or HDMI port on your laptop?** Visit [Training & Support](#) to find out what type of adapter is needed to connect your laptop.

**Powering Down the Equipment**
Press the POWER button on the LG remote control or the TV itself to turn it off.

Be sure to remove any media from the computer before shutting it down.
