**Share Video and/or Audio**

1. In your Zoom meeting, click on the green "Share Screen" icon or use Alt+S.

2. In the menu,

   - Share Video and/or Audio
   - Troubleshooting

*Click on the image to enlarge it*
hat appears, choose the screen or program that you will be presenting your video and/or audio from.
Troubleshooting

Note: if participants report a black screen try one of the following:

- Close any other programs or browser tabs that you are not using
- Update Zoom
- Restart your computer
- Try to share the video from a different device (i.e., a smartphone or tablet)
- Turn on/off Hardware acceleration (steps listed below)
- Update the graphics driver
  - For Windows users, use Windows Update
  - For Mac users, use the Software Update tool
- Uninstall and Reinstall Zoom
Open up the Zoom desktop app and click on the gear icon in the upperright.
In the menu that appears, click on "Share Screen".

Click on "Advanced" near the bottom.
Select/Deselect

Use hardware acceleration to optimize video sharing
